

## A solution engineered for Veterinary imaging, from the leader in medical imaging workflow solutions.

Study images, measurements, and patient demographics move from the modality into the Studycast system automatically. After that, the workflow is as simple as view, report, and share:

View your images and loops in the zero-footprint Studycast image viewer. Built in features include the ability to take post-exam measurements, annotate images, and flag them for review.

Document your exams with study-specific worksheets and generate a digitally signed final report with one click. Worksheets and reports are configurable to meet your facility's needs.

Send colleagues or clients a secure link via email or text message to view images and reports. Referring physicians can log into the Studycast system to view images and reports from anywhere.

Designed for usability and engineered for performance, the Studycast system offers speed, power, and flexibility in a single intuitive solution. View images and cine loops, document findings, and generate a structured report—all in your browser.

**Anywhere. Anytime. Instantly.**

### View and interpret with a powerful, comprehensive solution

- Zero-footprint synchronized viewer built for speed
- Smooth playback and responsive controls even with large echo loops
- Quickly save frames from any loop and add them to the final report
- Take post-exam measurements from within the image viewer for added flexibility
- View images and loops on any Internet-connected device—even a mobile phone

### Detailed templates and structured reports

- Veterinary reporting includes
- Breed and species-specific reporting
- Ultrasound, Xray, CT, MR, and more are supported
- Veterinary Echo reporting based on ASE guidelines
- Used by several top 15 vet schools

### Security and convenience with no additional IT burden

- The Studycast system is easy to implement, easy to use, and easy to manage
- Vendor neutral system works with the equipment you have now and the equipment you'll have in the future
- No hardware to maintain, no software to update, and no data storage to manage
- Exceeds HIPAA and PIPEDA standards for privacy and data security
- State-of-the-art encryption
- Data replicated in two geographically disparate enterprise class Tier III+ data centers
- Monthly software updates are deployed automatically

### Build consistent, high-quality reports quickly and easily

- Images and measurements from your equipment are ready to view, interpret, and share within seconds from acquisition.
- Generate findings with a click, or write your own
- Share images and reports, send securely to client's phone

### Save time with automated features and a single intuitive workflow

- Automated calculations and vendor-neutral measurement population in Studycast reporting tools
- Ability to quickly compare to priors
- Easily configure worksheets with presets and customized findings statements
- Automatically receive administrative reports for quality control and accreditation

### And it comes with

- **Fast, easy implementation** – Be up and running in a couple of weeks
- **Unlimited training** – On day one or day one thousand
- **Unlimited live support** – Talk to our outstanding support team Mon-Fri, 9am-8pm ET
